

## Cummins College of Engineering for Women, Pune Team Adira

The Electronics and Telecommunication department (E&TC) initiated Team Adira activity under guidance of Prof. Prachi Mukherjee in the year 2020-21. Electric vehicles (EV) just entered the market during this year. Prof. Prachi kept vision and started activity so students from the college can benefit and will be ready for designing EV. Team Adira Electric is a multidisciplinary team with members from diverse academic disciplines, united in the endeavor to construct the inaugural Electric Vehicle for both our institution and team. This project culminates in our participation in the esteemed Formula Bharat 2025 competition. We are currently the first and only **“All women’s” team** in the formula bharat competition under the electric category and aim to inspire and motivate more women engineers to make their mark in the world of motorsports.

The team received an **AIR 2 rank at Formula Bharat 2022-23** season in the Class 1 Combustion Category.

With great results in the Combustion category, we gloriously shifted to the Electric Vehicle category and achieved an **AIR 11 IN Pi-EV 2023 Competition** which is hosted by Formula Bharat itself. Presently Prof. Prachi Mukherjee and Prof. Nitin Palan , both are coordinating this activity.
